Volume Contents

Volume 15 Number 1

F. Demengel and J. Rauch	1	Weak convergence of asymptotically homogeneous functions of measures
A. L. Edelson and R. Vakilian	17	Asymptotic behaviour of higher order semilinear equations
W. E. Fitzgibbon and J. Morgan	27	Steady state solutions for certain reaction diffusion systems
I. Lasiecka and A. Stahel	39	The wave equation with semilinear Neumann boundary conditions
J. B. M. Xavier	59	Some existence theorems for equations of the form $-\Delta u = f(x, u, Du)$
I. W. Sandberg	69	Criteria for the stability of p-linear maps and p-powers
M. Fuchs	85	Hölder continuity of the gradient for degenerate variational inequalities
Software Survey Section	I	

Volume 15 Number 2

I. M. Ananjevskii and V. B. Kolmanovskii	101	Stabilization of some nonlinear hereditary mechanical systems
M. Nakao	115	Global existence of classical solutions to the initial-boundary value problem of the semilinear wave equations with a degenerate dissipative term
M. Cecchi and M. Marini	141	On the oscillatory behavior of a third order nonlinear differential equation
M. Arias	155	Nonselfadjoint boundary value problems at resonance with nonlinearities which may grow linearly
J. T. Hoag and R. D. Driver	165	A delayed–advanced model for the electrodynamics two-body problem
B. P. Rynne	185	Bifurcation from eigenvalues in nonlinear multiparameter problems
Software Survey Section	I	

Volume 15 Number 3

G. Čobanov, A. Marino and D. Scolozzi	199	Multiplicity of eigenvalues for the Laplace operator with respect to an obstacle, and nontangency conditions
B. Najman	217	The nonrelativistic limit of the nonlinear Klein–Gordon equation
Shen Zuhe and M. A. Wolfe	229	A note on the comparison of the Kantorovich and Moore theorems
B. Charny	233	Recursive formulas for transforming ODEs to a polynomial form
T. H. Otway	239	Higher-order singularities in coupled Yang–Mills–Higgs fields
I. Györi	245	Comparison results for integro–differential equations of Volterra type
J. M. de Graaf	253	A system of reaction–diffusion equations: convergence towards the stationary solution
M. Morháč	269	Determination of inverse Volterra kernels in nonlinear discrete systems
M. Grasselli, S. I. Kabanikhin and A. Lorenzi	283	An inverse hyperbolic integrodifferential problem arising in geophysics II
Software Survey Section	I	

Volume 15 Number 4

T. Senba, Y. Ebihara and Y. Furusho	299	Dirichlet problem for a semilinear elliptic equation with singular coefficient
M. Krätzschmar	307	Elliptic variational inequalities of monotone kind
P. S. Datti	321	Nonlinear wave equations in exterior domains
H. I. Freedman and Y. Kuang	333	Uniqueness of limit cycles in Liénard-type equations
P. Shi	339	An iterative method for obstacle problems via Green's functions
Liu Jiaquan	345	Bifurcation for potential operators

CHIN-YUAN LIN	355	Fully nonlinear parabolic boundary value problems in higher space dimensions (II)
R. DE ARCANGELIS	363	Compactness and convergence of minimum points for a class of nonlinear nonequicoercive functionals
W. ROTHER	381	Existence theorems for a nonlinear elliptic eigenvalue problem on $\mathbb{R}^N$
WEINIAN ZHANG	387	Discussion on the differentiable solutions of the iterated equation $\sum_{i=1}^{n} \lambda_i f^i(x) = F(x)$
SOFTWARE SURVEY SECTION	I	

Volume 15 Number 5

KEON-HEE LEE	399	Weak near periodicity in dynamical systems
T. L. GILL and W. W. ZACHARY	405	Existence and finite-dimensionality of attractors for a system of equations arising in ferromagnetism
T. KAPPELER and B. RUF	427	On the nodal line of the second eigenfunction of an inhomogeneous membrane
J. G. DIX and T. W. MCCABE	437	On finding equilibria for isotropic hyperelastic materials
F. CONRAD, D. HILHORST and T. I. SEIDMAN	445	Well-posedness of a moving boundary problem arising in a dissolution-growth process
P. KORMAN	467	On nonlinear singular perturbation problems
R. IKEHATA and N. OKAZAWA	479	Yosida approximation and nonlinear hyperbolic equation
SOFTWARE SURVEY SECTION	I	

Volume 15 Number 6

D. D. ANG, K. SCHMITT and L. K. VY	497	Noncoercive variational inequalities: some applications
BEI HU	513	A fiber-tapering problem
D. T. LUC	527	Contractibility of efficient point sets in normed spaces
S. REICH and I. SHAFRIR	537	Nonexpansive iterations in hyperbolic spaces

D. SFORZA 559 Infinite delay parabolic integro–differential equations with singular kernels

YISONG YANG 577 Vortices on asymptotically Euclidean Riemann surfaces

SOFTWARE SURVEY SECTION I

Volume 15 Number 7

N. HASSAN and W. RZYMOWSKI 597 An ordinary differential equation in nonlinear programming

K. KUTTLER 601 Initial boundary value problems for the displacement in an isothermal, viscous gas

N. HIRANO 625 Multiple solutions for quasilinear elliptic equations

J. R. CANNON and HONG-MING YIN 639 A periodic free boundary problem arising in some diffusion chemical reaction processes

R. W. CHANEY ✱ 649 Piecewise C^k functions in nonsmooth analysis

M. CARRIERO and A. LEACI 661 Existence theorem for a Dirichlet problem with free discontinuity set

G. BOUCHITTÉ and G. BUTTAZZO 679 New lower semicontinuity results for nonconvex functionals defined on measures

I. VECCHI 693 A note on entropy compactification for scalar conservation laws

SOFTWARE SURVEY SECTION I

Volume 15 Number 8

W. KRYSZEWSKI 697 An application of A-mapping theory to boundary value problems for ordinary differential equations

Y. TSUTSUMI 719 Rate of L^2 concentration of blow-up solutions for the nonlinear Schrödinger equation with critical power

A. SZULKIN 725 A relative category and applications to critical point theory for strongly indefinite functionals

J. L. MOLONY 741 Autonomous polynomial differential systems with finite escape times

L. H. Erbe, W. Krawcewicz and J. Wu	747	Leray–Schauder degree for semilinear Fredholm maps and periodic boundary value problems of neutral equations
D. G. B. Edelen	765	Alternatives to the Cartan–Kähler theorem
A. Nowakowski and A. Rogowski	787	Periodic solutions for a class of nonlinear hyperbolic equations
Software Survey Section	I	

Volume 15 Number 9

A. Novick-Cohen	797	On Cahn–Hilliard type equations
P. L. Felmer	815	Multiple periodic solutions for Lagrangian systems in T^n
X. Xu	833	Semigroup approach to the Cauchy problem for the equations $u_t - \alpha(u)_{xx} + \beta(u)_x \ni f$ with nonlinear boundary conditions
C. Guillopé and J. C. Saut	849	Existence results for the flow of viscoelastic fluids with a differential constitutive law
R. Michalek	871	Existence of a positive solution of a general quasilinear elliptic equation with a nonlinear boundary condition of mixed type
S. Wang	883	Remark on a convex nonlinear problem
M. Ramaswamy	891	On a counterexample to a conjecture of Saint Venant
Corrigendum	895	
Software Survey Section	I	

Volume 15 Number 10

G. Vidossich	897	A general existence theorem for boundary value problems for ordinary differential equations
J. V. A. Goncalves	915	On nonresonant sublinear elliptic problems
V. Dolezal	921	Estimating the difference of operator inverses and sensitivity of systems
J. L. Vazquez	931	New selfsimilar solutions of the porous medium equation and the theory of solutions of changing sign

M. Lin and R. Sine 943 Retractions on the fixed point set of semigroups of non-expansive maps in hyperconvex spaces

K.-H. Hoffmann, J. Sprekels and M. Niezgódka 955 Feedback control via thermostats of multidimensional two-phase Stefan problems

K.-H. Hoffmann, M. Niezgódka and Zheng Songmu 977 Existence and uniqueness of global solutions to an extended model of the dynamical developments in shape memory alloys

H. Okochi 991 A remark on the existence of periodic solutions to an evolution equation of parabolic-type

Software Survey Section I

Volume 15 Number 11

R. Kumar and P. C. Das 997 Perturbation of linear m-accretive operators in Hilbert spaces

D. D. Hai 1005 On a wave equation with nonlinear strong damping

C. Bernardi, V. Girault and L. Halpern 1017 Variational formulation for a nonlinear elliptic equation in a three-dimensional exterior domain

M. Badiale and M. Bardi 1031 Symmetry properties of solutions of Hamilton–Jacobi equations without uniqueness

Dao-Min Cao 1045 Positive solution and bifurcation from the essential spectrum of a semilinear elliptic equation on R^n

Ziliang Zhou 1053 New method on bifurcation and chaos of the logistic model

W. Allegretto and L. S. Yu 1065 On the existence of multiple decaying positive solutions of elliptic equations

G. Lippold 1077 Error estimates for the implicit Euler approximation of an evolution inequality

S. Carl and S. Heikkilä 1091 On a parabolic boundary value problem with discontinuous nonlinearity

Software Survey Section I

Volume 15 Number 12

D. O'Regan	1097	Singular second order boundary value problems
V. Jeyakumar	1111	Duality and infinite dimensional optimization
P. Dupuis and H. Ishii	1123	On oblique derivative problems for fully nonlinear second-order elliptic partial differential equations on nonsmooth domains
A. Shidfar	1139	Identification of unknown terms in a boundary condition from overspecified boundary data
D. Arcoya and A. Cañada	1145	The dual variational principle and discontinuous elliptic problems with strong resonance at infinity
E. N. Barron	1155	The Pontryagin maximum principle for minimax problems of optimal control
P. Quittner	1167	An instability criterion for variational inequalities
T. Wang	1181	A static bifurcation theorem for critical points
Software Survey Section	I
